RE: Safe, Clean Water Program

Dear Los Angeles County Board of Supervisors,

The Center for Geographical Studies at CSU, Northridge (CGS) is committed to working with the Los Angeles County Board of Supervisors to ensure safe and clean water for future generations through a multi-benefit stormwater and urban runoff capture program to increase water supply, improve water quality, and investment in communities. Given the abundance of students at CSUN from the local community and underserved populations, the Center has a strong interest in supporting all efforts that may provide multiple benefits (safeguarding public health, job creation and access to safe, clean water) to the surrounding community.

We write to strongly encourage the Safe, Clean Water Program to prioritize distributed and neighborhood scale, nature-based solutions to capture, infiltrate, treat and use stormwater and dry-weather runoff. Such projects and programs can help achieve a more sustainable and equitable water future for all communities in Los Angeles County.

Funding for nature-based and multi-benefit projects should include different project scales, from retrofitting residential parcels and schools, to large regional parks. We also firmly believe it be critically important that these projects be built throughout the region in an equitable way for all residents.

We are strongly committed to increasing local water supply to lessen the region's carbon footprint by reducing reliance on imported water and other energy-intensive water strategies. In addition, all projects should strive to reduce pollution and improve the health of waterways, habitat and beaches in the Los Angeles region.

We appreciate the County of Los Angeles' strong commitment to achieving a safe and clean water future for all residents. We stand ready to work with you on providing input on the Safe, Clean Water Program and to assist with outreach to communities and leaders throughout Los Angeles County.

Sincerely,

Danielle Bram

Director, Center for Geographical Studies - CSUN
