

Proposed Unincorporated County Stormwater Project Vicki Dr, Et al. Green Streets

○ **Project Scope**

The project will divert urban and stormwater runoff from local unincorporated communities for biofiltration and infiltration. The project will also include Low-Impact-Development landscaping features and educational signage.

○ **Project Benefits**

The project will improve the quality of our rivers and ocean, and provide educational and outreach opportunities.

○ **Project Location**

- Within the Upper San Gabriel River Watershed. Specific Location TBD.

○ **Cost Estimate**

- Total Project Cost: TBD

○ **Tentative Milestone Schedule**

- Currently – Planning Phase
- 2018 – Complete Project Concept Report
- 2019 – Prepare Design Plans
- 2019/2020 – Construct Project

Example Bioswale

Example Permeable Pavement

Example Modular Wetland
