Stormwater Investment Plan

Stormwater Investment Plan Upper Los Angeles River Watershed Area

The Stormwater Investment Plan (SIP) is an annual five (5) year plan developed by each Watershed Area Steering Committee (WASC) that recommends funding allocations for Projects and Programs in the Regional Program's Infrastructure Program, Technical Resources Program, and Scientific Studies Program.

The purpose of the SIP is to capture recommended programming for the upcoming fiscal year as well as anticipated recommendations for the next four subsequent years.

The following sections include details regarding the recommended SIP:

2 Summary of Meetings and Process

Refer to <https://safecleanwaterla.org/upper-los-angeles-river-watershed-area/> for the current list of WASC members, meeting dates, and meeting materials.

2.1 Call for Projects

The Call for Projects for FY21-22 funding ended on October 15, 2020. After a check for completeness by District staff, the WASC received an overview of project submittals. The WASC discussed the Projects, acknowledged the need for an accelerated timeline, and voted to send all Infrastructure Projects to be scored by the Scoring Committee.

2.2 Scoring

The Scoring Committee evaluated each project submittal and provided an official score based on the scoring criteria defined in the [Feasibility Study Guidelines](#). Since all Regional Program Projects must meet the Threshold Score of 60 points or more to be eligible for consideration in the Infrastructure Program, only those qualifying projects were returned to the WASC for further evaluation.

2.3 Presentations

The WASC received presentations from all Regional Program applicants that submitted complete proposals. Each presentation was allotted approximately 10 minutes of presentation time with 10 minutes for questions and answers; additional time for presentation or Q&A was accommodated when necessary. The committee members discussed each application at the conclusion of each presentation.

As appropriate, the WASC also received updates from the previous applicants on Projects, Concepts, and Studies, that were previously approved from the Year 1 SIP. Those recipients continued to execute their Transfer Agreements, receive funds, initiate the approved activities, and begin the formal reporting process.

Westmont - Vermont Avenue Green Improvement	\$6,550,000.00	0
Grand Total	\$81,679,217.00	28

3.2.9 Other Considerations

The projects included in the recommended SIP were selected based on the results from the Preliminary Ranking Worksheet and robust discussion of Project benefits, anticipated future funding requests, and available funding.

The Altadena - Lake Avenue Green Improvement and Westmont - Vermont Avenue Green Improvement projects requested SCW funding for design only. This would allow the applicant to reapply in future funding rounds to provide more accurate construction schedule and cost estimates and to seek out potential leveraged funding opportunities. The recommended SIP allows enough future budget headroom to accommodate the project's anticipated construction costs. The WASC decided to reallocate projections for the Victory ES - DROPS project to the current budget year to maximize interest accrued for Project applicants.

5.3 Discussion

The WASC received presentations for the Fire Effects Study in the ULAR Watershed Management Area, LAUSD Living Schoolyards Program Pilot Study, and the Regional Pathogen Reduction Study at the March 18th WASC Meeting and for the Evaluation of infiltration testing methods for design of stormwater drywell systems at the April 7th WASC Meeting. The District hired Southern California Coastal Water Research Project (SCCWRP) to provide independent, rapid, and unbiased evaluation (summary) of the technical adequacy of each scientific study proposal, which were shared with the project applicants and WASC members. At the WASC meeting, the project applicant was called upon to provide clarification and respond to the content of the SCCWRP summaries. The WASC decided to fund the Evaluation of infiltration testing methods for design of stormwater drywell systems, Fire Effects Study in the ULAR Watershed Management Area, and LAUSD Living Schoolyards Program Pilot Study Scientific studies based on the results from the Preliminary Ranking Worksheet.

6 Next Steps
