Appendix J. Composite Opportunity Maps

Projects and Programs that deliver multiple benefits are a cornerstone of the Safe, Clean Water (SCW) Program. While individual strategies can support specific SCW Program Goals, they are most effective when implemented together to create synergies across SCW Planning Themes. This appendix illustrates outcomes from the two composite opportunity analyses listed and described below¹:

- **Section J.1 Multiple Benefit Opportunity Across Planning Themes.** This analysis highlighted areas within the Watershed Area (WA) with the highest potential to deliver multiple benefits across key SCW Program Planning Themes.
- **Section J.2 Opportunity to Improve Water Quality and Increase Water Supply.** This analysis highlighted areas within the WA with the highest potential to deliver dual benefits—specifically, to Improve Water Quality through pollutant load reduction and Increase Water Supply through stormwater capture.

The maps included in this appendix provide a static representation of the data that aligns with the progress of the Initial Watershed Plans at the time they were developed. For interactive versions of these maps with the most current information, users should use the [SCW Program Watershed Planning Tool](#) (Planning Tool). The Planning Tool is regularly updated to incorporate new data, recent investments, and changing watershed conditions; it serves as the preferred method for viewing and analyzing composite benefit opportunity areas².

Figure J-1 and Figure J-2 illustrate the outcomes of the analyses described in Section J.1 and J.2, respectively, as visible on the Planning Tool. As illustrated in the figures, users can zoom in to areas of interest, toggle layers on the legend on the right-hand side of the map, then view details of specific features on the toolbar on the left-hand side of the map.

¹ Full descriptions of the data, methods, and sources for these analyses are provided in Appendix I.6.

² The Planning Tool also contains other composite opportunity analyses not listed in this Appendix.

Note: The Planning Tool is a live, dynamic platform that is regularly updated. As a result, map content, symbology, and available data may differ slightly from the static screenshot included here.

Figure J-1. Screenshot of the multi benefit opportunity across Planning Themes on the SCW Program Watershed Planning Tool

Note: The Planning Tool is a live, dynamic platform that is regularly updated. As a result, map content, symbology, and available data may differ slightly from the static screenshot included here.

J.1 Multiple Benefit Opportunity Across Planning Themes

The Multiple Benefit Opportunity Across Planning Themes composite opportunity identifies areas within the WA with the highest potential to deliver multiple benefits across key SCW Program Watershed Planning Themes (Improve Water Quality, Increase Drought Preparedness, Improve Public Health, Deliver Multi-Benefits with Nature-Based Solutions and Diverse Projects, and Equitably Distribute Benefits). Note, the relative opportunity classification (high, higher, highest) used in each map is defined in Appendix I.6.

To support various interested parties, Multiple Benefit Opportunity Across Planning Themes maps have been exported across multiple scales including:

- **Two-square-mile planning grids:** To highlight areas within the WA with the highest potential to deliver multiple benefits across key Planning Themes, two-square-mile planning grids are used. Maps for each grid cell within the WA are shown in Section J.1.1, from highest rank (i.e., highest relative opportunity) to lowest.
- **Municipalities:** To support targeted implementation by Project and Program proponents and Municipalities, maps for the Multiple Benefit Opportunity Across Planning Themes are exported at the municipal scale to highlight the opportunity levels within each. Maps for each municipality within the WA are shown in Section J.1.2.
- **Supervisory Districts:** To support targeted implementation from the perspective of Supervisory Districts, maps for the Multiple Benefit Opportunity Across Planning Themes are exported at the Supervisory District scale to highlight the opportunity levels within each. Maps for each Supervisory District within the WA are shown in Section J.1.3.

J.2 Opportunity to Improve Water Quality and Increase Water Supply

This composite opportunity identifies areas within the WA with the highest potential to Improve Water Quality and Increase Water Supply. Note, the relative opportunity classification (high, higher, highest) used in each map is defined in Appendix I.6.

To support various interested parties, Opportunity to Improve Water Quality and Increase Water Supply maps have been exported to across multiple scales including:

- **Two-square-mile planning grids:** To highlight areas within the WA with the highest potential to Improve Water Quality and Increase Water Supply, two-square-mile planning grids are used. Maps for each grid cell within the WA are shown in Section J.2.1, from highest rank (i.e., highest relative opportunity) to lowest.
- **Municipalities:** To support targeted implementation by Municipalities, the opportunity to Improve Water Quality and Increase Water Supply are exported at the Municipal scale to highlight the opportunity levels within each. Maps for each Municipality within the WA are shown in Section J.2.2.
- **Supervisory Districts:** To support targeted implementation from the perspective of Supervisory Districts, the opportunity to Improve Water Quality and Increase Water Supply are exported at the Supervisor District scale to highlight the opportunity levels within each. Maps for each Supervisory District within the WA are shown in Section J.2.3.
