Meeting: RH WASC Date: 5/19/2026

LA County Public Works may contact me for clarification about my comments

*Per Brown Act, completing this information is optional. At a minimum, please include an identifier so that you may be called upon to speak.

Phone participants and the public are encouraged to submit public comments (or a request to make a public comment) to SafeCleanWaterLA@dpw.lacounty.gov. All public comments will become part of the official record.

Please complete this form and email to SafeCleanWaterLA@dpw.lacounty.gov by at least 5:00pm the day prior to the meeting with the following subject line: "Public Comment: [Watershed Area] [Meeting Date]" (ex. "Public Comment: USGR 4/8/20").

Comments

Good afternoon Chair and Committee Members, My name is Alejandra Campos, and I am a Community Liaison at Willard Elementary School.

I work closely with our students and families, many of whom come from underserved communities both within Pasadena and from unincorporated areas of Los Angeles County.

For many of our families, access to safe parks, green space, and outdoor learning environments is limited or nonexistent. The Eaton Wash Stormwater Capture Project would directly address that need. It would provide a safe, welcoming space for our students to learn, play, and experience nature—something that is not part of their everyday environment.

This project is especially meaningful for our students who benefit from hands-on and inclusive learning opportunities, including those with special needs. It expands what we can offer as a school and strengthens the connection between our campus and the surrounding community.

We've seen strong excitement from families about what this space could become—not just for students, but for the broader community.

We strongly support funding for the Eaton Wash Stormwater Capture Project and the opportunities it will bring to the students and families we serve.

Comments

To the Committee Members,

As the Director of Public Works for the City of Montebello, I fully support the County's efforts to mitigate the fiscal burden associated with the operation and maintenance of the East Los Angeles Medians project. This effort to support the funding allocation assists the County as well as the cities of Monterrey Park and Montebello. This project assists the above-mentioned entities strive to achieve the State's water conservation goals. The project focused on integrating stormwater management through this urban greening project that captures and filtrates urban runoff. Project increases water supply to the region and the sustainable community benefits are beneficial to a disadvantage community.

Comments

Good afternoon Chair and Committee Members, my name is Claire Robinson, and I am the Founder and Managing Director at Amigos de Los Rios, an environmental non-profit organization based in Altadena, that focuses on developing green infrastructure and creating culturally relevant parks and open spaces in disadvantaged communities to connect youth to safe, accessible green space across our region.

We have working in partnership with the City of Pasadena on the Eaton Wash Stormwater Capture Project—providing community benefit design input and community outreach—building on and expanding our work to deliver resilient, nature-based improvements to communities with public schools like Willard Elementary School as hub. (We had a TRP from SCW for the work at this PUSD School and the proposed Eaton project is complementary).

From our perspective, it is critical that the Safe, Clean Water Program prioritizes projects that are ready to be constructed—projects that deliver real benefits to communities now.

Eaton Wash project reflects the vision of connecting youth to nature by creating over 3.5 acres of new park space in a community where many students live in apartments and lack access to green space at home. We are excited for students from Willard School to explore the spaces of the Eaton project which is in close proximity to the school—providing outdoor classrooms, hands-on learning, and notably we are enthusiastic about the ADA accesible nature rail and amenities included in the project because the Willard School population is comprised of 30% of special needs students who would enjoy these amenities of the Eaton Project.

Comments

Good afternoon Chair and Committee Members, my name is Pilar Reynaldo, a community member and advocate for environmental sustainability, watershed health, and nature-based solutions.

As a Master Gardener and community member, I strongly support the Eaton Wash Stormwater Capture Project. In the wake of the Eaton Fire, we have seen the loss of habitat, canopy, and ecological function across our region. This project represents an important step toward regeneration—restoring biodiversity, rebuilding native landscapes, and creating resilient green space for both people and wildlife.

What makes this project especially compelling is its ability to serve as a living classroom. It reflects the legacy of the former Earthside Nature Center—providing a setting for passive education, where students and the broader community can learn simply by being present in a thoughtfully designed natural environment.

With its proximity to schools and youth-serving organizations, this project becomes more than restoration—it becomes an investment in environmental stewardship for the next generation.

I strongly encourage the Committee to fund this project. Thank you.

Comments

Good afternoon Chair and Committee Members,

My name is Rachel Lindt and I am a consultant with Dudek, working on behalf of the City of Pasadena Public Works Department to support outreach and community engagement for the Eaton Wash Stormwater Capture Project.

Through this work, our team recently conducted an outreach event to gather input from local residents, students, teachers, and parents. As part of that effort, we received over 45 written letters expressing strong support for the project (see PDF attachment with scanned letters). I am submitting this comment to reflect and elevate that community feedback.

On behalf of the community members who participated in this process, I strongly encourage the Committee to support funding and advancement of the Eaton Wash Stormwater Capture Project.

Thank you for your time and consideration.

Rachel Lindt
Senior Planner, Dudek

I'm writing to share my support for the Eaton Wash Stormwater Capture Project. This project improves water quality for the City of Pasadena and downstream waterways through underground stormwater infiltration and treatment, while also giving new purpose to an area that was previously unused.

Transforming this space into a welcoming park where people can gather, walk, and enjoy nature is a real benefit for the community. Features like new trees, native plants, bioswales, stormwater features, walking paths, and comfortable places to sit will make it a space people want to spend time in. I especially appreciate that community input has helped shape these park features, ensuring the space reflects what we want and need.

I strongly support this project and the positive impact it will have on both our environment and our community.

Sincerely,

Name: Lili Daniel

I'm writing to share my support for the Eaton Wash Stormwater Capture Project. This project improves water quality for the City of Pasadena and downstream waterways through underground stormwater infiltration and treatment, while also giving new purpose to an area that was previously unused.

Transforming this space into a welcoming park where people can gather, walk, and enjoy nature is a real benefit for the community. Features like new trees, native plants, bioswales, stormwater features, walking paths, and comfortable places to sit will make it a space people want to spend time in. I especially appreciate that community input has helped shape these park features, ensuring the space reflects what we want and need.

I strongly support this project and the positive impact it will have on both our environment and our community.

Sincerely,

Name: Pippa
