PURPOSE AND BACKGROUND

At the October 5, 2021 Scoring Committee meeting, Chair Bruce Reznik requested that note-takers keep a list of the items discussed regarding the Safe, Clean Water Program (SCWP) scoring system. The following memorandum includes a list of systemic updates discussed or mentioned during Scoring Committee meetings since August 2021.

COMMITTEE'S ABILITY TO SCORE BASED ON SUBMITTALS

The following comments reflect the Committee's understanding of how it seeks additional information when a submittal is insufficient to verify the score, and what can and cannot happen during the back-and-forth with project proponents.

- December 9, 2021 - The Scoring Committee can only ask for clarifying information when planning to rescore projects. They cannot give guidance for improving projects. Applicants cannot make revisions after submitting (District staff).
- December 9, 2021 - For projects that are being rescored, funding requests cannot be changed from the original submittal (Vice Chair Moon).
- December 9, 2021 - Points requested by the applicant cannot be increased due to an update in the project (comment by Vice Chair Moon, concurrence from Chair Reznik and District staff).

PROJECTS DESIGNED TO EARN POINTS

The following comments reflect the Committee's thinking about projects that they deem to be designed or documented in such a way to earn high numbers of points, rather than designed towards the technical merits of the potential project.

- October 19, 2021 - Applicants are encouraged to focus on their presentations to the WASC, instead of focusing on raising their scores beyond 60 points, because it is not necessary to exceed the 60-point minimum (Chair Reznik).
- January 10, 2022 - The Scoring Criteria encourages applicants to overbuild/overdesign projects to receive Water Quality and Water Supply benefits. (Chair Reznik).

VARIATION IN INFRASTRUCTURE SUBMITTAL TYPES

The following comments reflect the Committee's thinking about how projects submitted for design funding only or a previously or concurrently implemented project seeking only O&M funding are difficult to evaluate alongside projects seeking design, implementation, and O&M funding.

- October 19, 2021 - Projects submitting for only Operations and maintenance (O&M) funding should be evaluated with a separate rubric (comment by Chair Reznik, concurrence from Vice Chair Moon).
- October 19, 2021 - Scoring should be based on O&M costs, rather than original project costs. Clearer direction needs to be provided. (Vice Chair Moon)
- October 19, 2021 - [A] project [that is seeking only O&M funding] does not need to be modeled because it has already been constructed (Vice Chair Moon).
- January 10, 2022 - Evaluation of the Water Quality and Water Supply scores will be / is more relaxed for projects seeking design-only funding (Member Matt Stone and Vice Chair Moon).
- January 10, 2022 - Design-only projects should be assessed under a different Scoring Criteria (Chair Reznik).

EVALUATING WET WEATHER VS. DRY WEATHER FOCUS

The following comments reflect the Committee considering the issues around assessing a project as providing wet weather water quality benefits as opposed to dry weather water quality benefits.

- October 5, 2021 - The Scoring Criteria does not factor the cost-effectiveness of dry weather projects (comment by Member David Sorem, concurrence by Vice Chair TJ Moon).
- October 19, 2021 - Need clearer criteria to determine whether large drainage projects apply as wet weather or dry weather projects (Chair Reznik).

PERMUTATIONS OF WATER SUPPLY BENEFITS

The following comments reflect the Committee considering how water supply benefits can be assessed and considered for other-than infiltration to groundwater.

- October 5, 2021 - A project's capacity to capture a large amount of water should not be held against applicants when a project is well-sited and has a good permeable surface (Vice Chair Moon).
- October 5, 2021 - Need to determine how to assess the offsetting of existing potable water use while providing water for additional vegetation (although it is a valuable form of community investment) (Chair Reznik).
- October 19, 2021 - Should offsetting new demand count towards a project's Water Supply Benefit? (Chair Reznik)
- October 19, 2021 - Net Water Supply Benefits should be considered. For example, it should be assessed whether the project offsets an existing need or if it simply offsets needs generated by the project itself (i.e., through new plantings).

Reference: Scoring Committee Systemic Comments

- November 17, 2021- In regard to the Water Supply credit for partial infiltration and partial diversion to water recycling – the Committee should consider how diversion to recycling will augment water supply if capacity of treatment facilities is (currently) already fully accounted for (Chair Reznik).

NATURE-BASED SOLUTIONS

The following comments reflect the Committee considering the elements of Nature-Based Solutions.

- October 5, 2021 - Applicants should be asked whether trees being removed will be replaced (Member Kristen Schwarz).
- October 5, 2021 - Not enough points are awarded for connectivity between habitat patches or between community areas with open space (Chair Reznik and Member Schwarz).
- October 5, 2021 - Generally disappointed by the amount of hardscape removed in projects across the SCWP (Chair Reznik).
- October 19, 2021 - Points awarded for impervious surface removal should be based on actual square footage, rather than a percentage (Chair Reznik).
- October 19, 2021 - For Nature-Based Solutions, the Scoring Criteria should consider the size of impermeable surface removed, rather than the percentage, because proponents limit project area to receive maximum impermeable surface reduction points (Chair Reznik).
- November 22, 2021 - Why is the boundary for impervious surface counted toward the total benefit?

OTHER ITEMS

The following comments reflect other issues raised by members of the committee that were not similar to the categories identified above.

Community Engagement

- October 19, 2021 - The Community Engagement Assessment for developing projects should reflect what applicants have already done in addition to what they should plan to do if/when they receive SCWP funding.

School Greening Projects / Goal

- October 5, 2021 - A project that is adjacent to a school, rather than within a school, should not receive points for achieving school greening (Chair Reznik).

Displacement

- October 5, 2021 - The Scoring Criteria does not address projects' impacts on displaced communities.

Infrastructure capacity

- January 10, 2022 - Los Angeles Sanitation requests that a sewer capacity study be a required component of the feasibility study (Member Stone).

Reference: **Scoring Committee Systemic Comments**

Leverage Funding

- October 5, 2021 - The Scoring Criteria for Leveraging Funds points is too rigid. A project with 24.5% shouldn't get zero, while a project with 25% gets 3 (Member David Diaz).

IDENTIFYING EXEMPLARS:

The following are examples of the Committee members identifying an element of a project that has one or more elements that were exemplary.

- October 5, 2021 - The project advisory committee that Amigos de los Rios assembled for the Jackson Elementary Project is a great example of community engagement prior to project submittal (Chair Reznik).
- October 5, 2021 - Bilingual materials used for the Whitsett Fields Park North Stormwater Capture Project (Member Schwarz).
