

FUNDING REPORT

Quarter 1 – July 2026

Leveraged funding is a key program goal in the Safe, Clean Water (SCW) Program Implementation Ordinance (Chapter 18.04). Watershed Coordinators play a supporting role in “identify[ing] potential partners and additional sources of funding to augment and leverage SCW Program revenues” for Safe, Clean Water Regional Program projects (Chapter 18.07). This funding report provides a landscape overview of recent funding policy highlights and shares currently active and upcoming funding opportunities that may be relevant to Safe, Clean Water Program infrastructure projects.

For more information, please contact SafeCleanWaterLA@pw.lacounty.gov.

POLICY HIGHLIGHTS

State Highlights

On May 14, 2026, California Governor Gavin Newsom released the Fiscal Year (FY) 2026-27 May Revision of the state budget, which reflects updated economic forecasts from the January proposed budget. The proposal underwent revisions by the legislature, and the final spending plan was signed by Governor Newsom on June 29, 2026. The new budget went into effect on July 1, 2026. A complete summary of the Budget Act of 2026 can be found [here](#).

ACTIVE FUNDING OPPORTUNITIES

The programs highlighted below are funding opportunities that may be the most relevant to Safe, Clean Water Program projects. As of July 24, 2026, these programs are currently open and accepting applications. See the attached funding matrix for a more extensive list of relevant funding opportunities.

[**Bureau of Reclamation’s WaterSMART Enhancing Water Resources Projects**](#) provides funding to implement projects that benefit water resource management for multiple uses, including water conservation and efficiency projects, water infrastructure improvements, and river and watershed restoration. Projects that balance numerous community interests (e.g., agriculture, recreation, fisheries, power, etc.), are developed collaboratively, and provide significant watershed benefits will be prioritized under this funding opportunity. Eligible projects include those that improve the timing or quantity of available water for the benefit of watershed health; improve water quality and temperature; or improve conditions and outcomes for fish and wildlife. Eligible applicants include States, Tribes, irrigation and water districts; State, regional, and local authorities or non-profit conservation organizations and watershed groups that are acting in partnership with an aforementioned entity. This program funds implementation and construction projects. A 25% cost share is required. A total of \$60,000,000 in funding is available, and grants range from \$50,000-\$3,000,000. The first application period will close **September 9, 2026**, and the second application period will close **September 8, 2027**.

[**Department of Forestry and Fire Protection’s \(CAL FIRE\) Tribal Wildfire Resilience Grants**](#) are part of CAL FIRE’s Climate and Energy Program and support California Native American Tribes in managing ancestral lands, implementing and promoting Traditional Environmental Knowledge in wildfire resilience, and establishing wildfire safety for Tribal communities. The grants fund planning and implementation projects that serve California Native American Tribes and advance wildfire resilience, forest health, and cultural use of fire. Eligible applicants include federally recognized Native American Tribes, non-federally recognized Tribes on the California Native American Heritage Commission’s California Tribal Consultation List, and tribally-led 501(c)(3) non-profit with documentation. Grants range from \$250,000 - \$3,000,000. The application deadline is **September 8, 2026**.

FUNDING REPORT

Quarter 1 – July 2026

Strategic Growth Council's Transformative Climate Communities (TCC) Program funds community-led development and infrastructure projects that achieve major environmental, health, and economic benefits in California's most disadvantaged communities. TCC empowers the communities most impacted by pollution to choose the strategies and projects best suited to achieve their community vision and enact transformational change. TCC's unique, place-based strategy for reducing greenhouse gas emissions is designed to catalyze collective impact through a combination of community-driven climate projects in a single neighborhood. Projects must reduce greenhouse gas emissions significantly over time, leverage additional funding sources, and provide health, environmental and economic benefits to the community. Planning, Project Development, and Implementation Development Grants are available.

Eligible applicants include a public or local agency, nonprofit organization, special district, joint powers authority, Tribe, public utility, local publicly owned utility, or mutual water company. Grant awards range from \$300,000 to \$25,000,000. Those requesting technical assistance must submit a Technical Assistance Request Form by July 31, 2026. Applications for Planning, Project Development, and Implementation Development Grants are all due **September 30, 2026**.

U.S. Fish and Wildlife Service's Coastal Program provides technical and financial assistance to partners to support projects that protect and restore fish and wildlife habitats on public and private lands in priority coastal ecosystems. This support is provided through cooperative agreements with conservation partners and landowners, including state and Tribal agencies. Coastal Program staff work with partners, stakeholders, and other U.S. Fish and Wildlife Service programs in important areas for conservation. They implement regional strategic plans that identify priority species and habitats for conservation in these focus areas.

Eligible applicants include public and Indian housing authorities, federally recognized Native American Tribal governments, Federal and State governments, for-profit and non-profit organizations, and public and private educational institutions. Projects must meet at least one of the following highlighted criteria: the project supports the Service's conservation mission, supports the conservation goals and priorities in the current regional Coastal Program strategic habitat conservation plan, will build coastal resilience by helping ecosystems and coastal communities, or will build the capacity of communities to conserve fish and wildlife habitat for coastal-dependent species. The Program funds planning, implementation, and acquisition projects. 150 awards are expected, and the grant maximum is \$500,000. The application deadline is **September 30, 2026**.

Bureau of Reclamation's WaterSMART Cooperative Watershed Management Program provides funding to develop local solutions to address their water management needs. This opportunity provides funding for watershed group development, restoration planning, and watershed management project planning and design. By providing this funding, Reclamation promotes water reliability and cooperation between stakeholders to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies. Eligible applicants must be either an existing watershed group or sponsoring the establishment of a new watershed group, defined in the Cooperative Watershed Management Act as "a grassroots, non-regulatory entity that addresses water availability and quality issues within the watershed and is capable of promoting the sustainable use of water resources." Eligible activities include, but are not limited to performing an analysis of the watershed to identify and prioritize watershed management projects, evaluating site alternatives to identify specific project locations, evaluating economic conditions, preparing project cost estimates, and developing a project implementation plan, and conducting monitoring activities. This program funds planning and design projects. A total of \$25 million is available, and grants range from \$50,000-\$300,000. Applications are open for four rounds and due on the following dates: **October 7, 2026; February 24, 2027; September 1, 2027; and February 15, 2028**.

California State Water Resources Control Board's Water Recycling Funding Program provides technical and financial assistance to agencies for water recycling projects that promote beneficial use of

FUNDING REPORT

Quarter 1 – July 2026

treated municipal wastewater, using General Funds and bonds. The Program funds planning and construction projects.

Only local public agencies are eligible to receive Planning grants. Eligible planning costs are those necessary to determine the feasibility of using recycled water and to select an alternative to offset or augment the use of fresh/potable water from state or local supplies. A proposed study is not required to be on the Clean Water State Revolving Fund (CWSRF) to receive a planning grant. The cost-share requirement is 50% for planning grants, but may be reduced for disadvantaged communities.

Eligible applicants for Construction projects include local public agencies, 501(c)(3) nonprofit organizations, public utilities, Native American Tribes, and mutual water companies. Construction projects must offset or augment state or local fresh water supplies. Eligible costs include the construction of a recycled water treatment facility, storage facilities, pumping facilities, and groundwater recharge facilities. Construction grants are calculated at 35 percent of the estimated eligible construction costs.

Applicant and project eligibility may vary based on funding sources available at the time a project or research is approved for funding. In State FY 2026-27, the State Water Board is expected to have approximately \$89.9 million in grant funds available for WRFP construction projects. The State Water Board also has authority to commit approximately \$18.6 million in planning grants and approximately \$35.6 million in construction loans. A 50% local cost share is required, but cost share may be reduced for communities that meet Disadvantaged Community criteria under the Clean Water State Revolving Fund. The program has an **ongoing, rolling application period**, dependent on funding availability from funding sources.

[California Department of Toxic Substances Control's Brownfields Revolving Loan Fund \(RLF\) Grant Program](#) provides grants for two types of brownfield sites: hazardous substance release sites and petroleum sites. Grantees may also use funds for pre-cleanup site assessments and for environmental cleanup. Eligible applicants include local governments, Tribal entities, and nonprofits, and developers not liable under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 107. The program has an **ongoing, rolling application period**. More information can be found by scheduling a meeting with the program manager to discuss eligibility.

[San Gabriel and Lower Los Angeles Rivers & Mountains Conservancy \(RMC\) Consolidated Grant Program](#) includes a single grant application for multiple funding sources, including non-bond priorities grant programs and Proposition 1, 68, and 4 funds. A full listing of funding sources and amounts is published on the Local Assistance and Support Budget report on the **[RMC Board Meetings page of the website](#)**, updated at each meeting. Applicants do not need to specify which funding source they are applying to. Once an application is submitted, RMC staff will determine the most appropriate funding source(s) based on the project's alignment with the funding sources and duration of the project. This program has an **ongoing, rolling application period**.

Eligible applicants include State and Federal agencies, Tribal entities recognized by the U.S. Federal Register or as a California Native American tribe, local public agencies (including water districts and school districts), local conservation corps, nonprofit organizations, and Joint Powers Authorities. Eligible projects include planning, implementation, acquisition, and technical assistance.

[Caltrans' Stormwater Treatment Partnership Programs](#) provide funding to stormwater projects that improve regional water quality and facilitate partnerships with municipalities to achieve compliance with Caltrans' National Pollutant Discharge Elimination System (NPDES) permit. There are two partnership programs, the Cooperative Implementation Agreements (CIA) Program and the Financial Contribution Only (FCO) Program. Both programs are **ongoing**, and annual funds are determined in March of each fiscal year based on Caltrans' Stormwater operating expenses. Projects that are not awarded funding in the

FUNDING REPORT

Quarter 1 – July 2026

current round remain eligible for funding in future rounds. For more information, please contact Los Angeles County Caltrans Stormwater Coordinator [Anand Maganti](#).

[California Wildlife Conservation Board General Grants](#) funds planning, implementation, acquisition, technical assistance, and scientific study projects that provide one or more of the following benefits: 1) Protect or enhance biodiversity; 2) Climate change resiliency and connectivity; 3) Support State Wildlife Action Plan priority habitats; 4) Conserve or enhance working landscapes; 5) Conserve or enhance water-related projects; and 6) Enhance public access. The **application cycle is continuous**, and it is recommended that applicants first consult the Wildlife Conservation Board (WCB) staff prior to completing a pre-application. Award amounts vary based on current available funds and the application pool. Funding amounts are determined by the WCB voting board and grants manager. There is no cost-share requirement.

[California State Water Resources Control Board's Clean Water State Revolving Fund \(CWSRF\)](#) offers low-cost financing for a wide variety of wastewater and water quality projects, including funding for water reuse and stormwater projects. Financing is offered through low-interest loans at half the general obligation bond rate. Stormwater mitigation projects are also eligible for loan forgiveness. California's CWSRF receives annual funds from principal and interest on past loans, federal allocations, periodic allocations to the State Water Board from the California annual budget, and other funds approved by California voters such as Propositions 1, 68, and 4. The California CWSRF offers an average of \$940 million in financing annually. Section 91011 of Proposition 4 allocated \$610 million in grants or loans that improve water quality or help provide clean, safe, and reliable drinking water.

Applications are accepted on a **rolling basis and are reviewed at the end of the calendar year**. Projects in small (defined as less than 20,000 people) and/or disadvantaged communities are prioritized for grant funding and principal loan forgiveness. Specific funding percentages and caps change by the year but are developed annually through a stakeholder-driven process and released in that year's [Intended Use Plan](#). Some public entities are unable to apply for the CWSRF financing due to conflicting requirements with existing debt.

[Wildlife Conservation Board's \(WCB\) Stream Flow Enhancement Program \(SFEP\)](#) funds projects that enhance stream flows across the state of California. The SFEP defines enhanced streamflow to mean: a change in the amount, timing, and/or quality of water flowing down a stream, or a portion of a stream, to benefit fish and wildlife. Funded projects are also consistent with the objectives and actions outlined in the California Water Action Plan, with the primary focus on enhancing flow in streams that support anadromous fish; support special-status, threatened, endangered, or at-risk species; or provide resilience to climate change. Eligible project phases include acquisition, planning, implementation, and scientific studies. **Pre-applications are now open and accepted on a rolling basis.**

[WCB's Habitat Enhancement and Restoration Program](#) supports a wide variety of restoration projects that fall outside WCB's other mandated programs. Broad categories of the Program's projects include, but are not limited to, habitat restoration (e.g., coast, wetland, grassland), wildlife corridors, and fisheries enhancements (e.g., fish ladders, barrier removal). **Pre-applications are open and accepted on a rolling basis.**

UPCOMING FUNDING OPPORTUNITIES

The programs highlighted below are upcoming funding opportunities that may be the most relevant to Safe, Clean Water Program projects. As of July 24, 2026, these programs are not currently active but are forecasted to open. See the attached funding matrix for a more extensive list of relevant funding opportunities.

FUNDING REPORT

Quarter 1 – July 2026

[Department of Water Resources' \(DWR\) Watershed Resilience Grant Program](#) supports projects that improve water resilience and adaptation across California. This program aims to help communities build stronger, more sustainable watersheds to better handle climate challenges. A Proposition 4 Workshop on Watershed Resilience Grant Program was held on April 30, 2026, from 9:00AM-12:00PM. The workshop provided a general overview of the program, discussed upcoming Proposition 4 funding opportunities, and provided an opportunity for early input on program development ahead of developing Guidelines. Draft Grant Guidelines for the Watershed Resilience Grant Program are anticipated to be released in **Fall 2026**.

[Department of Water Resources' \(DWR\) Sustainable Groundwater Management Grant Program](#) provides funding to Groundwater Sustainability Agencies (GSAs) and other responsible entities under the Sustainable Groundwater Management Act (SGMA) to promote healthy and sustainable groundwater basins, to reduce and eliminate undesirable effects, and to promote projects that provide multiple benefits while also improving groundwater supply and quality. A Proposition 4 Workshop on the Sustainable Groundwater Management Grant Program was held on April 30, 2026, from 9:00AM-12:00PM. The workshop provided a general overview of the program, discussed upcoming Proposition 4 funding opportunities, and provided an opportunity for early input on program development ahead of developing Guidelines. Draft Grant Guidelines for the Sustainable Groundwater Management Grant Program are anticipated to be released in **Fall 2026**.

[CAL FIRE's Urban and Community Forestry Grant Program](#) funds projects that lead the effort to advance the development of sustainable urban and community forests in California. Draft Grant Guidelines are currently under development and anticipated to be released in Fall 2026.

[California Water State Resources Control Board's Storm Water Grant Program \(SWGP\)](#) will award planning and implementation grants for multi-benefit urban stormwater management projects through the Stormwater Grant Program (SWGP), as established in California Public Resources Code (PRC), chapter 2, section 91023. Eligible applicants per Proposition 4 (PRC section 90110) include: public agencies, local agencies, nonprofit organizations, special districts, joint powers authorities, public utilities, federally recognized Native American Tribes, non-federally recognized California Native American Tribes listed on the Native American Heritage Commission's Tribal Consultation List; local publicly owned utilities; and mutual water companies. Eligible projects include, but are not limited to planning and design, stormwater capture and reuse, stormwater recharge; low-impact development, restoration of urban streams and watersheds, debris flow mitigation, and increasing permeable surfaces to help reduce flooding. Awards for Planning grants range from \$200,000-\$750,000, and awards for Implementation grants from \$1,000,000-\$15,000,000. A Public Workshop for Draft Guidelines was held on July 21, 2026, and Draft Guidelines are anticipated to be released in **Summer 2026**.

SAFE, CLEAN WATER PROGRAM FUNDING HIGHLIGHTS

The City of Bellflower's Simms Park Stormwater Capture Project is currently leveraging \$2.9 million through a combination of "\$400 thousand from SCW Program Municipal Funds, \$500 thousand in County Measure A Parks for the City of Bellflower, and \$2 million from the City of Bellflower Parks Local Funds," as stated in its Project Modification Request. While the City requested additional funds due to cost escalations, the City also returned to Lower San Gabriel River Watershed Area Steering Committee reporting that it has simultaneously increased its cost-share by \$2 million to absorb some of the cost escalations.

Additionally, the Simms Park Stormwater Capture Project was recently awarded a \$4 million grant for construction through Los Angeles County Regional Parks and Open Space District's Competitive Grant Program in March 2026.

FUNDING REPORT

Quarter 1 – July 2026

Funding programs change frequently. The identified funding opportunities compiled are a list of potentially relevant opportunities, updated as of July 16, 2026. Further research should verify project-specific eligibility requirements, latest funding levels, and appropriate timelines. Use the links attached to research these programs further. If you are unsure about your project's eligibility or competitiveness, contacting program coordinators via contact emails or webinars is recommended. Safe, Clean Water Program Watershed Coordinators can also support leveraged funding efforts. The [Federal Grants Portal](#), [California Grants Portal](#), and [CFCC Funding Fairs](#) can serve as additional resources to identify funding opportunities.

Safe, Clean Water Program - Funding Matrix

01/2027 - July 2026 Update

Program	Theme	Status	Geography	Agency/Organization	Purpose / Goals	Eligible Applicants	Eligible Use of Funds	Project Type	Match/Cost Share Requirement	Funding Terms	Timing and Recurrence
Name of Program	Topic Area(s) of Focus	Active or Upcoming?	National, State, Regional	Name of Agency/Organization	Program Purpose / Goals	Eligible Applicant Types	Eligible Use and Eligible Projects	Project phase	Yes/No.	Min. & Max. Award Amount and Other Considerations	Frequency and Cycles
WaterSMART Enhancing Water Resources Projects	Water Conservation, Infrastructure, Habitat Restoration / Conservation	Active	National	Bureau of Reclamation	The objective of the WaterSMART Enhancing Water Resources Projects funding opportunity is to invite eligible entities to apply for funding to implement projects that benefit water resource management for multiple uses, including water conservation and efficiency projects, water infrastructure improvements, and river and watershed restoration. Projects that balance numerous community interests (e.g., agriculture, recreation, fisheries, power, etc.), are developed collaboratively, and provide significant watershed benefits will be prioritized under this funding opportunity.	States, Tribes, irrigation and water districts; State, regional, and local authorities or Non-profit conservation organizations and watershed groups that are acting in partnership with an entity listed above	Eligible projects include those that improve the timing or quantity of available water for the benefit of watershed health, improve water quality and temperature, or improve conditions and outcomes for fish and wildlife.	Implementation / Construction / Monitoring	25%	\$60M of funding is available. Minimum: \$50K Maximum: \$3M	The first application period will close Wednesday, September 9, 2026 , at 3:00 PM PST, and the second application period will close Wednesday, September 8th, 2027, at 3:00 PM PST.
Tribal Wildlife Resilience Grants Solicitation 2026	Hazard Mitigation / Resilience, Community Services	Active	State	Department of Forestry and Fire Protection	Tribal Wildlife Resilience grants is part of CAL FIRE's Climate and Energy Program and supports California Native American tribes in managing ancestral lands, implementing and promoting Traditional Environmental Knowledges in wildfire resilience, and establishing wildfire safety for tribal communities.	Federally recognized Native American Tribes, non-federally recognized Tribes on the California Native American Heritage Commission's California Tribal Consultation List, and tribally-led 501(c)(3) non-profit with documentation.	Tribal Wildlife Resilience grants fund planning and implementation projects that serve California Native American Tribes and advance wildfire resilience, forest health, and cultural use of fire. These projects address critical needs in tribal communities, and may include: - Cultural and prescribed burns - Creation and maintenance of shaded fuel breaks - Forest and wildfire resilience projects such as dead and dying tree removal, understory thinning and/or removal, tree or other native and/or traditional vegetation plantings - Forest health projects that provide benefits such as increasing biodiversity and improving access to and use of traditional foods and culturally significant species - Workforce Development and training programs in fire, forestry, and related Traditional Ecological Knowledges - Mapping projects - Development of restoration plans, fire or forest management plans - Biological and cultural surveys - Environmental compliance and permitting	Planning / Implementation	No.	\$10M of funding is available. Minimum: \$250K Maximum: \$3M Amount per award is dependent on project.	Application deadline is September 8, 2026 .
Transformative Climate Communities Planning Grant	Hazard Mitigation / Resilience, Habitat Restoration / Conservation, Brownfields, Transportation, Community Services	Active	State	Strategic Growth Council	The Transformative Climate Communities (TCC) Program funds community-led development and infrastructure projects that achieve major environmental, health, and economic benefits in California's most disadvantaged communities. TCC empowers the communities most impacted by pollution to choose the strategies and projects best suited to achieve their community vision and enact transformational change. All with data-driven milestones and measurable outcomes.	Lead applicants must be a public or local agency, nonprofit organization, special district, joint powers authority, Tribe, public utility, local publicly owned utility, or mutual water company. Applications should demonstrate strong, diverse partnerships rooted in the community.	TCC's unique, place-based strategy for reducing greenhouse gas emissions is designed to catalyze collective impact through a combination of community-driven climate projects in a single neighborhood. Projects must reduce greenhouse gas emissions significantly over time, leverage additional funding sources, and provide health, environmental and economic benefits to the community. Planning, Project Development, and Implementation Development Grants are available. Project examples include, but are not limited to: - Affordable and sustainable housing developments - Transit stations and facilities - Electric bicycle and car share programs - Solar installation and energy efficiency - Water-energy efficiency installations - Urban greening and green infrastructure - Bicycle and pedestrian facilities - Recycling and waste management - Health equity and well-being projects - Brownfields redevelopment - Community microgrids - Indoor air pollution reduction	Planning / Implementation	Planning and Project Development: No Implementation: A minimum of 50%	Minimum: \$300K Maximum: \$25M	Technical Assistance Request Forms are due July 31, 2026 . TCC Round 6 Applications are due September 30, 2026 .
Transformative Climate Communities Implementation Grant	Hazard Mitigation / Resilience, Habitat Restoration / Conservation, Brownfields, Transportation, Community Services	Active	State	Strategic Growth Council	The TCC Program furthers the purposes of AB 32 (Nunes, 2006) and AB 2722 (Burke, 2016) by funding projects that reduce greenhouse gas emissions (GHG) through the development and implementation of neighborhood-level transformative climate community plans that include multiple coordinated GHG emissions reduction projects that provide local economic, environmental, and health benefits to disadvantaged communities.	Business Nonprofit Public Agency Tribal Government Eligible Lead Applicants may be: California Native American Tribes, Tribally-owned nonprofits, IRC 501 (c)(3) tax-exempt nonprofit organizations, public agencies, local agencies, special districts, joint powers authorities, public utilities, local publicly owned utilities, or mutual water companies.	Applicants must select at least three strategies from the list below and propose projects that advance those strategies. Strategies should be thoughtfully selected and integrated to best meet the community's needs. At least 15% of the TCC grant award must be allocated to direct implementation costs for projects under these strategies. 1. Equitable Housing and Neighborhood Development 2. Land Acquisition for Neighborhood Stabilization 3. Transit Access and Mobility 4. Solar Installation, Energy Efficiency, and Appliance Electrification 5. Water Efficiency and Resiliency 6. Recycling, Composting, and Waste Reduction 7. Urban Greening and Green Infrastructure 8. Health Equity and Well-Being 9. Indoor Air Quality 10. Community Microgrids 11. Brownfield Redevelopment 12. Community Resilience Centers 13. Other Climate Innovation	Implementation	None for applicants who qualify for Tribal Funding Goal. Minimum 25% for applicants who qualify for Disadvantaged Unincorporated Community Funding Goal. Minimum 50% for all other applicants.	Approximately \$82.5M is available for three Implementation Grant awards of up to \$27.5M each.	Application deadline is September 30, 2026 .
Transformative Climate Communities Project Development Grant	Hazard Mitigation / Resilience, Habitat Restoration / Conservation, Brownfields, Transportation, Community Services	Active	State	Strategic Growth Council	The TCC Program furthers the purposes of AB 32 (Nunes, 2006) and AB 2722 (Burke, 2016) by funding projects that reduce greenhouse gas emissions (GHG) through the development and implementation of neighborhood-level transformative climate community plans that include multiple coordinated GHG emissions reduction projects that provide local economic, environmental, and health benefits to disadvantaged communities.	Nonprofit Public Agency Tribal Government A Lead Applicant must be based in California and be one of the following: - California Native American Tribes - Tribally-owned nonprofit - IRC 501 (c)(3) tax-exempt nonprofit organization - Public agency - Local agency - Special district - Joint powers authority - Public utility - Local publicly owned utility - Mutual water company	Eligible Project Development activities include, but are not limited to: - Pre-development activities, including: - Community engagement - Feasibility studies - Market analysis - Environmental assessments - Land and project management surveys - Remediation - Site and development plans - Project designs - Permitting - Financial planning (e.g., preliminary budget and construction financing) - Infrastructure pre-development and development of its long-term operations and maintenance plans for clean water supply systems and wastewater infrastructure The proposed grant activities must include community engagement activities and address climate resilience. Applicants may also address other Transformative Elements such as displacement avoidance and workforce development, if applicable.	Project Development	No.	Maximum: \$5M	Application deadline is September 30, 2026 .

Coastal Program FY26	Habitat Restoration / Conservation	Active	National	Fish and Wildlife Service	The U.S. Fish and Wildlife Service (Service) Coastal Program provides technical and financial assistance to partners to support projects that protect and restore fish and wildlife habitats on public and private lands in priority coastal ecosystems. This support is provided through cooperative agreements with conservation partners and landowners, including state and Tribal agencies. Coastal Program staff work with partners, stakeholders, and other Service programs in important areas for conservation. They implement regional strategic plans that identify priority species and habitats for conservation in these focus areas.	Government: Public and Indian housing authorities, federally recognized Native American tribal governments, County governments, City or township governments, Special district governments, State governments Business: For-profit organizations and small businesses Nonprofit: Other Native American tribal organizations, Nonprofits (non-higher education) without 501(c)(3), Nonprofits (non-higher education) with 501(c)(3) Miscellaneous: Individuals, unrestricted Education: Independent school districts, private institutions of higher education, public and state institutions of higher education	Projects must meet at least one of the factors below to be considered: • The project supports the Service's conservation mission. • The project will contribute to long-term fish and wildlife habitat conservation. • The project supports the conservation goals and priorities in the current regional Coastal Program strategic habitat conservation plan. • The project will conserve habitat for Federal trust species (Endangered Species Act-listed species, migratory birds, interjurisdictional fish, and certain marine mammals for which the Service has management authority), species proposed for listing, State listed species, imperiled species, species of conservation concern, focal species, and other at-risk species. • The project will contribute to fish and wildlife habitat connectivity and reduce fragmentation. • The project will build coastal resilience by helping ecosystems and coastal communities. • The project will complement conservation on National Wildlife Refuges and other public or private conserved lands. • The project will build the capacity of communities to conserve fish and wildlife habitat for coastal-dependent species. • The project engages Native American Tribes and/or will benefit Tribal communities. • The project will expand fish and wildlife oriented recreational opportunities.	Planning / Implementation / Acquisition	No.	150 awards expected. Maximum: \$300K	Application deadline is September 30, 2026 .
WatersSMART Cooperative Watershed Management Program	Watershed Development, Habitat Restoration	Active	National	United States Bureau of Reclamation	The WaterSMART Cooperative Watershed Management Program funding opportunity invites eligible entities to apply for funding to develop local solutions to address their water management needs. This opportunity provides funding for watershed group development, restoration planning, and watershed management project planning and design. By providing this funding, Reclamation promotes water reliability and cooperation between stakeholders to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies.	Applicants must be either an existing watershed group or sponsoring the establishment of a new watershed group as defined in the Cooperative Watershed Management Act. As defined in Section 4002 of the Cooperative Watershed Management Act (see "legislative Authority" below for full citation), a "watershed group," is a grassroots, non-regulatory entity that addresses water availability and quality issues within the watershed and is capable of promoting the sustainable use of water resources. A watershed group makes decisions on a consensus basis, and represents a diverse group of stakeholders, such as hydroelectric producers, livestock grazing, timber production, land development, recreation or tourism, irrigated agriculture, the environment, municipal water supplies, private property owners, Federal, state and local governments, and Tribes.	Eligible activities are grouped into three areas: Watershed Group Development, Watershed Restoration Planning, Watershed Management Project Planning and Design. Watershed Group Development (include but are not limited to): • Developing missions statement, conducting outreach, gathering information about issues and needs Watershed Restoration Planning (include but are not limited to): • Developing general watershed management project concepts or performing an analysis of the watershed to identify and prioritize watershed management projects • Conducting monitoring activities • Conducting mapping, obtaining data, performing modeling and other technical analyses, or developing goals and benchmarks for the watershed restoration plan Watershed Management Project Planning and Design (include but are not limited to): • Evaluating site alternatives to identify specific project locations • Developing project requirements and evaluating design alternatives • Preparing design drawings and specifications for construction up to the 90% level • Evaluating economic conditions, preparing project cost estimates, and developing a project implementation plan.	Planning / Project Design	No.	Total of \$25M is available. 100 awards are expected. Minimum: \$30K Maximum: \$300K 20-25 awards will be granted per round. A total of up to \$300,000 in federal funds may be awarded to an applicant over the three-year period, with no more than \$100,000 to be available per year.	First Round: October 7, 2026, 3:00 p.m. PST Second Round: February 24, 2027, 3:00 p.m. PST Third Round: September 1, 2027, 3:00 p.m. PST Fourth Round: February 15, 2028, 3:00 p.m. PST
Water Recycling Funding Program	Water Quality / Water Supply	Active	State	CA State Water Resources Control Board	The Water Recycling Funding Program (WRFP) supports the State Water Resources Control Board's Water Recycling Policy and provides funding for water recycling projects that offset or augment state or local fresh water supplies and water recycling research. The mission of the Water Recycling Funding Program (WRFP) is to promote the beneficial use of treated municipal wastewater (water recycling) in order to augment fresh water supplies in California by providing technical and financial assistance to agencies and other stakeholders in support of water recycling projects and research. Loans and grants are available.	Applicant and project eligibility may vary based on the funding sources available at the time a project or research is approved for funding. Planning grants: Only local public agencies are eligible to receive a planning grant. Construction grants: Local public agencies, 501(c)(3) nonprofit organizations, public utilities, Native American Tribes, and mutual water companies. Eligible applicants are dependent on the funding source.	Eligible projects include: Recycled water treatment / storage / distribution, groundwater recharge, indirect potable reuse, and surface water augmentation. Eligible planning costs are those necessary to determine the feasibility of using recycled water and to select an alternative to offset or augment the use of fresh/potable water with state or local funds. A proposed study is required to be on the Clean Water State Revolving Fund (CWSRF) to receive a planning grant. Construction projects must offset or augment state or local fresh water supplies. Eligible costs include the construction of a recycled water treatment facility, storage facilities, pumping facilities, and groundwater recharge facilities.	Planning / Construction	Planning: 50% local cost share requirement. Cost share may be reduced for communities that meet Disadvantaged Community criteria under CWSRF. Construction: The grant will be established as 35% of the reasonable, estimated construction cost of the project.	Period of performance through June 30, 2033.	Ongoing, rolling application. Funding availability dependent on funding sources In State FY 2026-27, the State Water Board is expected to have approximately \$89.9M in grant funds available for WRFP construction projects. The State Water Board also has authority to commit approximately \$18.6M in planning grants and approximately \$35.6M in construction loans.
Emergency Watershed Protection (EWP) Program	Hazard Mitigation / Resilience, Habitat Restoration / Conservation	Active	Federal	United States Department of Agriculture	The EWP Program offers technical and financial assistance to help local communities relieve imminent threats to life and property caused by floods, fires, windstorms and other natural disasters that imperil a watershed.	Recovery projects begin with a local sponsor or legal subdivision of state or Tribal government. Eligible sponsors include cities, counties, towns, conservation districts, or any federally recognized Native American Tribe or tribal organization. Interested public and private landowners must work through a sponsor.	NRCS offers financial and technical assistance for various activities under the EWP Program, including: • Remove debris from stream channels, road culverts and bridges; • Reshape and protect eroded streambanks; • Correct damaged or destroyed drainage facilities; • Establish vegetative cover on critically eroding lands; • Repair levees and structures; • Repair certain conservation practices, and • Purchase of EWP Buyouts. EWP does not require a disaster declaration by federal or state government officials for program assistance to begin. The NRCS State Conservationist can declare a local watershed emergency and initiate EWP program assistance in cooperation with an eligible sponsor.	Construction	25% required.	Not specified.	Applicants must apply within 60 days of the disaster event.
Community Partnership Program	Water Supply, Outreach / Education	Active	Regional	Metropolitan Water District of Southern California	This Program provides up to \$3,000 in sponsorships to community-based organizations including nonprofits, professional associations, educational institutions and public agencies to teach about the importance of water.	Local, regional, state, and national organizations with Sec. 501(c)(3) tax status, non-profit educational institutions and public agencies. Funding is also available to organizations having 501(c)(4), 501(c)(6), and 501(c)(12) tax status. Priority is given to applicants in Metropolitan Water District's six-county service area.	Eligible projects include water-related educational outreach programs like community forums, workshops and water festivals; water-themed curriculum and supplies for grades K-12; after-school programs, exhibits, promotional materials, and native plant and California Friendly garden signage. Projects in underserved communities are especially encouraged to apply.	Outreach/Education	No.	Maximum: \$3K	Applications are reviewed on a rolling basis. Funding is replenished at the start of every Fiscal Year (July 1). Applications must be submitted at least 30 days prior to the start date of the program or event.
County Priority Projects Program - Measure A Annual Allocation Grant Program	Parks / Green Space / Recreation	Active	Regional	Los Angeles County Regional Parks Open Space District	County Priority Projects grants will fund projects that are determined to be priorities by the Board of Supervisors (BOS).	Applicants must provide proof that the project meets all the following Project Eligibility requirements to apply for a grant award: • The project is a capital project or the planning and design for a capital project; and, • The project is consistent with the most recent PNA, UPNA, or another adopted park planning tool. Applicants should submit a 2-page Letter of Intent (LOI) to the Office of the District Supervisor of the project location to determine priority level and funding eligibility.	Below is a non-exhaustive list of projects that may be eligible for grant funds under the County Priority Projects Program. This list is intended to assist the BOS in understanding the types of projects on which County Priority Projects Program funds can be expended, not to limit or direct projects chosen for completion. • Community and local parks, including pocket parks, playgrounds, playground equipment, dog parks, and picnic areas, especially those that connect and restore underutilized spaces; • Community and senior recreational centers; • Park safety, graffiti removal, facility safety lighting, safe routes to schools, and other safety improvements; • Greenspace and greenway development; • Gardens; • Urban canopy development to reduce the heat island effect, especially in heavily urbanized, tree-poor areas of the County; • Refurbishment, updating, or expansion of current parks and park amenities; and • Planning and design related projects.	Planning / Implementation	Not specified.	Granted on a request-basis. LOIs are evaluated on a rolling basis by each Supervisor's Office and may or may not be recommended for funding.	Up to two percent of annual Measure A revenue is allocated to this program. Available funding for each of the five Supervisorial Districts will be declared by September 15th of every year. This includes new and unawarded funding from prior years.
Maintenance & Servicing Program - Annual Allocation Grant Program	Parks / Green Space / Recreation	Active	Regional	Los Angeles County Regional Parks Open Space District	Funds designed to support RPOSD-funded capital outlay projects that are maintained and operated in perpetuity per grant agreement. This program is administered separately from RPOSD's other grant programs. The program is meant to offset increased maintenance costs resulting from Proposition A-funded projects.	Projects that received RPOSD grant funds under Proposition A. Eligible grantees include public agencies, LA County Department of Public Works and Harbors, LA County Department of Parks and Recreation, LA County Department of Public Works, Joint Powers Authorities, and non-profit organizations. M&S cannot be used for a project that did not receive RPOSD funding.	Eligible uses include annual maintenance costs such as recurring labor, contracts, services, and supplies necessary to preserve and extend the longevity, accessibility, and usability of grant-funded improvements.	Operations & Maintenance	Not required.	Dependent on annual allocations	Maintenance & Servicing Funds are allocated annually . Annual allocation amounts are based on revenue received by September 15th of each year.

Coastal Conservancy Grants	Habitat Restoration / Conservation, Hazard Mitigation / Resilience	Active	State	State Coastal Conservancy	The Coastal Conservancy funds a wide variety of projects along the California coast, San Francisco Bay, and in coastal watersheds to increase the availability of beaches, parks and trails for the public; to protect and restore natural lands and wildlife habitat; to preserve working lands; and to increase community resilience to the impacts of climate change. Multi-benefit projects, projects that serve disadvantaged communities, and projects that advance the objectives in the Conservancy's 2013 – 2027 Strategic Plan and regional and statewide plans will receive higher priority for funding.	Public agencies, including Joint Powers Authorities and federally-recognized Indian Tribes, are eligible. Nonprofit organizations with 501(c)(3) status are eligible. Other community-based organizations and non-federally recognized tribes may apply with a 501(c)(3) fiscal sponsor.	Projects that benefit public access, natural resources, working lands, and climate resilience at the coast, coastal watersheds, and the San Francisco Bay are eligible. The Conservancy will fund most stages of a project, including pre-project feasibility studies; property acquisition; project planning, including community involvement; design; environmental review; permitting; construction; and project related monitoring.	Acquisition / Planning / Implementation	Not specified.	There are no maximum or minimum grant amounts for this funding. However, it is anticipated that most grants will be between \$200K and \$5M.	Receives annual appropriations through the Coastal Conservancy's budget cycle. Also channels increased State investments in Coastal Conservation appropriated through the Budget Acts. \$948.5M allocated to the Coastal Conservancy through the Climate Bond over multiple years. Rolling pre-application solicitation for most Conservancy grants, including Climate Ready, Wildfire Resilience, and all regional grant programs. The Conservancy also holds periodic grant rounds related to specific programs or funding sources. Information on those grant rounds and their deadlines are posted on the program website and emailed to the listserve when they are open. All applicants are encouraged to request a technical assistance consultation with the Regional Manager covering your project area to discuss project eligibility before beginning the application process.
CA Clean Water State Revolving Fund (SRF)	Wastewater / Clean Water	Active	State	CA State Water Resources Control Board	Financing is offered through low-interest loans. Disadvantaged communities have the ability to apply for principal forgiveness (PF). The Clean Water SRF acts as an infrastructure bank, receiving annual capitalization grants from the EPA and state funds through annual budgets, state ballot measures, and a variety of other avenues. The Federal CWSRF has offered over \$150 billion in financing since 1988. The Federal SRF funds are administered through state-level SRF funds, including California's CWR and CWSRF, which are authorized under California Water Code Sections 13475-13485. The CA CWSRF receives annual funds from principal and interest on pool loans, federal allocations, periodic allocations to the State Water Board from the California annual budget, and other funds approved by California voters, such as Proposition 1 and Proposition 68. Applications are accepted on a rolling basis and prioritize disadvantaged communities. Specific funding percentages and caps change by the year but are developed annually through a stakeholder-driven process and released in that year's Intended Use Plan (IUP). Financing is for a wide variety of water quality projects.	Public agencies, Tribal governments, Nonprofits	The CWSRF can finance publicly owned treatment facilities, nonpoint source projects, and estuary projects. The most common types of application received are for wastewater treatment plants and sewer systems. The most successfully funded types of projects (organized by category and ranked in order of most to least funded during the 2021-2022 FY as an example) include: secondary treatment, advanced treatment, new interception, water reuse, sewer system rehab, and energy efficiency. Applications can be submitted for different types of projects: (a) Water / Energy Audit (focused on driving water efficiency), (b) Construction (for projects that restore or maintain water quality), and (c) for Planning / Design (focused on wastewater systems). Can also apply to these through CA state grants.	Infrastructure and Non-Infrastructure Projects	Not required.	\$1M to > \$100M No maximum funding limit, but partial funding may be applied in annual CWSRF Intended Use Plan. Financing is offered through low-interest loans (at half the general obligation bond rate). Grants and PF may be available to small communities and disadvantaged communities.	Funding is available annually. Applications are accepted on a rolling basis and reviewed at the end of each calendar year.
Infrastructure State Revolving Fund Program (ISRF)	Community Sustainability / Infrastructure	Active	State	Infrastructure and Economic Development Bank	Low-cost, direct loans to governments and nonprofits sponsored by public agencies for infrastructure and economic projects that improve and sustain communities.	Municipalities and any subdivision of local government; special districts; public benefit, tax exempt nonprofits	Eligible projects include, but are not limited to: water and wastewater treatment plant upgrades or construction; street repair and upgrades; drainage; flood control; water supply; parks & recreational facilities; environmental mitigation measures; educational facilities; sewage collection & treatment; and water distribution.	Acquisition / Construction / Equipment & Machinery / Planning	Not required.	Amounts of funding range from \$1M to \$60M with loan terms for useful life of project up to 30 years. IBank uses a proprietary interest rate method to ensure borrowers have the best chance to receive below-market interest rates. Interest rates are fixed up to 30 years.	Ongoing, rolling application. Total funding program amount is \$100M.
Replacing, Removing, Or Upgrading Underground Storage Tanks	Stormwater, Water Supply	Active	State	CA State Water Resources Control Board	Finance up to 100% of costs necessary to upgrade, remove, or replace UST project tanks to comply with Health and Safety Code.	Must be UST owner / operator and also: (1) be a small business, (2) be CA-based, (3) facility of project tank location must have been legally in business retailing gasoline after Jan 1st, 1995, (4) all tanks owned & operated by grant must be in compliance.	Typical projects include: removing / replacing single-walled USTs or piping; UST upgrades; under-dispenser containment boxes; electronic monitoring systems; and leak detection testing.	Implementation / Infrastructure	Not required.	UST Operators / Owners eligible for \$3K-\$70K. Remote public fueling stations are eligible for \$40K additional funding. No period of performance.	Ongoing, rolling application.
Proposition 68 Rivers and Streams Grant Program (Severely Disadvantaged Communities)	Habitat Restoration / Conservation	Active	State	CA Department of Fish and Wildlife	For restoring and protecting rivers and streams in support of fisheries and wildlife. Priorities include reconnection of rivers with floodplains, riparian habitat restoration, protection of upper watershed forests and meadow systems.	Nonprofit, public agency, Tribal Government. Additional eligibility requirements apply to public utilities, urban water suppliers, and ag water suppliers.	Examples include: restoring / protecting riparian and aquatic habitat, reconnecting historical floodplains, modernizing stream crossings, restoring river channels, improving ecological function, improving local watershed management, and restoring and protecting upper watershed forests / meadows. Severely disadvantaged community has median household income of less than 60%.	Planning / Implementation / Acquisition	Not required.	Period of performance is 3 years.	Ongoing, rolling application. Total funding available is approximately \$10M.
BMC Grant Programs	Habitat Conservation/ Climate Resilience/	Active	Regional	San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy (BMC)	The BMC is awarding grants and interagency agreements with the goal of creating open space, habitat restoration, expanding green space in disadvantaged communities, and protecting the watersheds of the San Gabriel and Los Angeles Rivers, Dominguez Channel, and Catalina Island.	State and Federal agencies, Tribal entities recognized by the U.S. Federal Register or as a California Native American tribe, local public agencies (including water districts and school districts), local conservation corps, nonprofit organizations, Joint Powers Authorities	Projects must be consistent with BMC's enabling legislation (Public Resources Code, Division 22.8), Common Ground, its Environmental Justice and Tribal Consultation Policies, and existing adopted river and flood control projects/plans. Projects should create, expand, and/or improve public open space throughout the region by improving access, habitat quality, water security, and wildlife resilience, as well as promote stewardship of the landscape via stakeholder involvement and long-term maintenance that will encourage environmental, social, and economic benefits. Non-bond Priorities Grant Programs include: Wildfire Prevention Grant Program, Climate Resilience Grant Program, and Lower Los Angeles Urban Streams and Rivers Program. Applicants do not need to specify the specific funding source for their project.	Planning / Implementation / Acquisition	Not required.	Typically \$3K- \$3M. Small grants may be awarded from \$50K-\$200K.	Ongoing, rolling application period. Applications will be submitted in two phases: a concept proposal and a full application. The concept proposal will first be reviewed by BMC staff before selecting which proposals will move forward to submit a full application.
Brownfields Revolving Loan Fund (RLF) Grant Program	Brownfields	Active	State	California Department of Toxic Substances Control	Provides grants for two types of brownfield sites: hazardous substance release sites and petroleum sites. Grantees may also use funds for pre-cleanup site assessments and for environmental cleanup.	Local governments, Tribal entities, nonprofit developers not liable under CERCLA section 107	The grant program funds cleanup and assessment related costs. Schedule meeting with program manager to discuss eligibility.	Assessment / Implementation	Not specified.	Not specified.	Ongoing, rolling application period.
Senate Bill 1 Sea Level Rise Adaptation Planning Grant Program - Track 1	Hazard Mitigation/ Resilience, Coastal Protection, Habitat Protection & Restoration	Active	State	Ocean Protection Council	OPC's SB 1 SLR Adaptation Planning Grant Program (SB 1 Grant Program) aims to provide funding for coastal communities to develop consistent SLR adaptation plans and projects to build resilience to SLR along the entire coast of California and San Francisco Bay. The SB 1 Grant Program is designed to ensure all California coastal communities are preparing for SLR through a consistent and equitable process utilizing a set of SLR Adaptation Criteria (SLR Criteria).	Local governments, regional governments, federally recognized Tribal Governments	Track 1: SLR Adaptation Planning supports planning for local governments. Activities include pre-planning, data collection, and planning.	Planning	Not required.	\$200K-\$1.5M	Proposals will be accepted on a rolling, quarterly basis.
Third District Discretionary Funding Grant	Parks/ Green Space / Recreation, Education, Community Services	Active	Regional	Los Angeles County Executive Office of the Board - District 3	To support community-serving organizations in the 3rd District	Requesting organization must have a location in the Third District; requested funds must benefit Third District constituents and communities. Non-profit and for-profit non-sectarian organizations.	Requests may include, but are not limited to, educational/recreational projects, arts and cultural programs, environmental awareness programs/projects, public safety programs, health and social service initiatives and programs. Grants can also provide an organization with one-time funding to purchase equipment and needed materials or to make repairs or improvements to a physical site. "Seed" grants are also available to enable new and innovative work, if all other criteria is met.	Not specified.	Not required.	Not specified.	Three cycles throughout the year: Cycle 1 - due January 31 Cycle 2 - due June 30 Cycle 3 - due October 31
Fourth District Discretionary Grant	Parks/ Green Space / Recreation, Education, Community Services	Active	Regional	Los Angeles County Executive Office of the Board - District 4	The purpose of the Fourth District Discretionary Grants is to support organizations within the Fourth District that are providing services to our residents. Funds must be used to benefit the community and are not for private purposes or activities.	The agency requesting funding should serve Fourth District residents. Agency type not specified.	Grant funding should support direct services or community events. Each funding grant must meet the social need of the residents of the County, including arts, health, law enforcement, public safety, rehabilitation, education, legal services, and disability services.	Not specified.	Not required.	Not specified. Grants over \$2,500 must submit a line-item budget.	Ongoing, rolling application.

Habitat Enhancement and Restoration Program	Hazard Mitigation/ Resilience, Habitat Restoration / Conservation	Active	State	Wildlife Conservation Board	The Habitat Enhancement and Restoration Program (HERP) was WCE's first program and incorporated all restoration projects until other WCE programs were initiated in 1990. HERP continues to support a wide variety of restoration projects that fall outside WCE's other mandated programs. HERP projects are distributed throughout California and all habitat types. Broad categories of HERP projects include, but are not limited to: • Habitat restoration (e.g., coast, wetland, grassland) • Wildlife corridors • Fisheries enhancements (e.g., fish ladders, barrier removal)	501(c)(3) nonprofit organizations, local governmental agencies, federal agencies, state agencies, and California Native American Tribes.	HERP continues to support a wide variety of restoration projects that fall outside WCE's other mandated programs. HERP projects are distributed throughout California and all habitat types. Broad categories of HERP projects include, but are not limited to: • Habitat restoration (e.g., coast, wetland, grassland) • Wildlife corridors • Fisheries enhancements (e.g., fish ladders, barrier removal)	Design / Permitting / Construction / Monitoring	No.	Not specified.	Ongoing, rolling pre-applications.
Stream Flow Enhancement Program	Hazard Mitigation/ Resilience, Habitat Restoration / Conservation	Active	State	Wildlife Conservation Board	The Stream Flow Enhancement Program (SFEF) funds projects that enhance stream flows across the state of California. The SFEF defines enhanced streamflow to mean: a change in the amount, timing, and/or quality of water flowing down a stream, or a portion of a stream, to benefit fish and wildlife. Funded projects are also consistent with the objectives and actions outlined in the California Water Action Plan, with the primary focus on enhancing flow in streams that support anadromous fish; support special status, threatened, endangered, or at-risk species; or provide resilience to climate change.	501(c)(3) nonprofit organizations, local governmental agencies, federal agencies, state agencies, and California Native American Tribes.	Examples of project types (should not be viewed as exhaustive list of eligible project types): • Water conservation projects (actions that provide more efficient use of water diverted or reduce the amount diverted from a stream, resulting in enhanced stream flow) coupled with adequate long term (20+ years) protections for the conserved water • Groundwater storage and conjunctive use • Reservoir operations both at existing and new storage sites • Habitat restoration projects that enhance stream flow and improve aquatic and riparian conditions • Wet meadow restoration • Forest management practices (e.g., thinning) • Reconnecting flood flows with restored flood plains • Eradication of invasive plant species with high water use rates, relative to native plant species • Acquisition of land or interests in land that lead to a direct and measurable enhancement to stream flow, improving upon existing flow conditions • Stream flow gauging • Scientific studies that assess effectiveness of previously implemented projects and/or inform design and implementation of future stream flow enhancement projects)	Acquisition / Planning / Implementation / Scientific Study	No.	Not specified.	Ongoing, rolling pre-applications open.
First District Community Grants	Parks/ Green Space / Recreation, Education, Community Services	Upcoming	Regional	Los Angeles County Executive Office of the Board - District 1	The purpose of the Community Grant Program is to develop or support services that meet the diverse needs of the residents of the First District, including but not limited to, health, violence prevention, environmental justice, immigration, and jobs.	Non-profit organizations with a project that supports First District residents. Applicants who have received a Community Grant may reapply for additional funding. Applications should improve the well-being of residents, especially of those most vulnerable or economically disadvantaged.	Funding for program costs for existing services, planning new projects, or implementation/expansion of services. Ongoing staffing, operations, and/or salaries are not generally considered. Priority funding areas include: • Arts and Culture • Environment • Health • Housing and Homelessness • Jobs • Parks & Open Space • Public Safety and Diversion • Transportation • Social Services • Immigration • Veterans • Children and Families	Not specified.	Not required.	Not specified.	Temporarily suspended. Ongoing, rolling application.
Second District Funding Request	Parks/ Green Space / Recreation, Education, Community Services	Upcoming	Regional	Los Angeles County Executive Office of the Board - District 2	To support and develop services that support the diverse needs of the residents of the Second District. Funding will improve the quality of life for residents. The Second District's office strives to provide these funds through an equity lens, focusing funds on services that support our most underrepresented and underserved communities. The funding is intended for small grant amounts and is one-time in nature.	Not specified. Priority given to organizations based out of the Second District.	Funding request must meet the social needs of the population of Los Angeles County, including but not limited to the areas of health, public safety, rehabilitation, well being, education, and legal services, and to assist in the needs of the physically, mentally and financially challenged persons and aged persons pursuant to California Government Code 26227. Priority will be given to organizations based in the Second Supervisorial District. Requests must focus on serving the residents of the Second Supervisorial District. Funding requests for direct programs or services are prioritized.	Not specified.	Not required.	Not specified.	Currently closed. Small grant funding requests closed on March 31.
Storm Water Grant Program (SWGP) - Planning Grants	Stormwater Management	Upcoming	State	CA State Water Resources Control Board	The Safe Drinking Water, Wildfire Prevention, Drought Preparedness, and Clean Air Bond Act of 2024 (Prop 4) was approved by California voters in the general election on November 5, 2024. These Prop 4 Stormwater Grant Program Guidelines (Guidelines) establish the process and criteria that the State Water Resources Control Board (State Water Board) will use to solicit applications, evaluate and select applications, and award grants for multi-benefit urban stormwater management projects through the Stormwater Grant Program (SWGP), as established in California Public Resources Code (PRC), chapter 2, section 91023.	Eligible applicants per Prop 4 (PRC section 90110) include: • Public agencies • Local agencies • 501(c)(3) nonprofit organizations • Special districts • Joint powers authorities • Public utilities • Federally recognized Native American Tribes • Non-federally recognized California Native American Tribes listed on the Native American Heritage Commission's Tribal Consultation List • Local publicly owned utilities • Mutual water companies	Eligible project-specific planning projects may include tasks such as feasibility studies, preliminary design, final design, geotechnical investigations, environmental documents, monitoring and other planning/design work necessary to completely develop a project and prepare it for implementation. Planning projects will not include implementation, but it is anticipated that completed planning grants will prepare project proponents to proceed to implementation through other funding sources. Specific types of eligible projects include, but are not limited to: • Planning and design • Stormwater capture and reuse • Stormwater recharge • Low-impact development • Restoration of urban streams and watersheds • Debris flow mitigation • Increasing permeable surfaces to help reduce flooding	Planning	No.	Minimum: \$200K Maximum: \$750K	Public Workshop for Draft Guidelines was held on July 21, 2026. Draft Guidelines to be released Summer 2026.
Storm Water Grant Program (SWGP) - Implementation Grants	Stormwater Management	Upcoming	State	CA State Water Resources Control Board	The Safe Drinking Water, Wildfire Prevention, Drought Preparedness, and Clean Air Bond Act of 2024 (Prop 4) was approved by California voters in the general election on November 5, 2024. These Prop 4 Stormwater Grant Program Guidelines (Guidelines) establish the process and criteria that the State Water Resources Control Board (State Water Board) will use to solicit applications, evaluate and select applications, and award grants for multi-benefit urban stormwater management projects through the Stormwater Grant Program (SWGP), as established in California Public Resources Code (PRC), chapter 2, section 91023.	Eligible applicants per Prop 4 (PRC section 90110) include: • Public agencies • Local agencies • 501(c)(3) nonprofit organizations • Special districts • Joint powers authorities • Public utilities • Federally recognized Native American Tribes • Non-federally recognized California Native American Tribes listed on the Native American Heritage Commission's Tribal Consultation List • Local publicly owned utilities • Mutual water companies	Specific types of eligible projects include, but are not limited to: • Planning and design • Stormwater capture and reuse • Stormwater recharge • Low-impact development • Restoration of urban streams and watersheds • Debris flow mitigation • Increasing permeable surfaces to help reduce flooding	Implementation	No.	Minimum: \$1M Maximum: \$15M	Public Workshop for Draft Guidelines was held on July 21, 2026. Draft Guidelines to be released Summer 2026.
Sustainable Groundwater Management Grant Program	Water Quality, Water Supply	Upcoming	State	California Department of Water Resources	The mission of the Sustainable Groundwater Management Grant Program is to provide funding to Groundwater Sustainability Agencies (GSAs) and other responsible entities under the Sustainable Groundwater Management Act (SGMA) to promote healthy and sustainable groundwater basins, to reduce and eliminate undesirable effects, and to promote projects that provide multiple benefits while also improving groundwater supply and quality.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	Proposition 4 Workshop on SGMA Grant Program was held on April 30, 2026, from 9:00AM-12:00PM. The workshop provided a general overview of the program, discussed upcoming Proposition 4 funding opportunities, and provided an opportunity for early input on program development ahead of developing Guidelines. Draft Guidelines anticipated to be released Fall 2026.

Watershed Resilience Grant Program	Hazard Mitigation / Resilience, Water Quality, Water Supply	Upcoming	State	California Department of Water Resources	The Watershed Resilience Implementation Grant Program, funded by Proposition 4, will support projects that improve water resilience and adaptation across California. This program aims to help communities build stronger, more sustainable watersheds to better handle climate challenges.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	Proposition 4 Workshop on Watershed Resilience Grant Program was held on April 30, 2026, from 9:00AM-12:00PM. The workshop provided a general overview of the program, discussed upcoming Proposition 4 funding opportunities, and provided an opportunity for early input on program development ahead of developing Grant Guidelines. Draft Guidelines anticipated to be released Fall 2026.
CAL FIRE Urban and Community Forestry Grant Program	Parks / Green Space / Recreation / Climate Resilience	Upcoming	State	California Department of Forestry and Fire Protection (CAL FIRE)	The mission of the California Department of Forestry and Fire Protection's Urban Forestry Program is to lead the effort to advance the development of sustainable urban and community forests in California.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	To be Announced. Draft Guidelines under development.	Grant Guidelines anticipated to be released in Fall 2026.
