RE: Safe, Clean Water Program

Dear Los Angeles County Board of Supervisors,

The Sierra Club Angeles Chapter Water Committee is committed to working with the Los Angeles County Board of Supervisors to ensure safe and clean water for future generations through a multi-benefit stormwater and urban runoff capture program to increase water supply, improve water quality, and investment in communities. Sierra Club Angeles Chapter is a 40,000 plus strong organization serving Los Angeles and Orange Counties. Our mission to Enjoy, Explore, Protect extends to our local water supplies and infrastructure.

We write to strongly encourage the Safe, Clean Water Program to prioritize distributed and neighborhood scale, nature-based solutions to capture, infiltrate, treat and use stormwater and dry-weather runoff. Such projects and programs can help achieve a more sustainable and equitable water future for all communities in Los Angeles County. Cities and water districts must plan for the effects of climate change and snow drought on our imported water supplies that loom on the horizon.

Maintaining an adequate water supply requires long term planning.

Funding for nature-based and multi-benefit projects should include different project scales, from retrofitting residential parcels and schools, to large regional parks. We also firmly believe it be critically important that these projects be built throughout the region in an equitable way for all residents. To that end, we ask the Board of Supervisors to urge water districts and cities to invest in the Safe, Clean Water Program in lieu of California Water Fix, which will bring no new water or jobs to the region yet will cost the rate payer and cities much more, than implementing a multi benefit capture program, contributing to a less equitable water future for Angelenos.

We are strongly committed to increasing local water supply to lessen the region's carbon footprint by reducing reliance on imported water and other energy-intensive water strategies. In addition, all projects should strive to reduce pollution and improve the health of waterways, habitat and beaches in the Los Angeles region.

We appreciate the County of Los Angeles' strong commitment to achieving a safe and clean water future for all residents. We stand ready to work with you on providing input on the Safe, Clean Water Program and to assist with outreach to communities and leaders throughout Los Angeles County.

Sincerely,

Charming Evelyn
Chair Water Committee
Sierra Club Angeles Chapter
