

East Los Angeles Sustainable Median Stormwater Capture Project

○ Project Scope

The project will divert urban and stormwater runoff from surrounding areas including unincorporated communities and the Cities of Monterey Park and Montebello into infiltration/dry wells underneath medians. The project will also include above ground improvements including Low-Impact-Development features, passive recreation, and educational signage.

○ Project Benefits

The project will improve the quality of our rivers and ocean, increase our local water supply (Central Basin), provide community enhancement, and provide educational and outreach opportunities.

○ Project Location

- Northside Dr between Simmons Ave and Garfield Ave (East Los Angeles)
- Southside Dr between Simmons Ave and Garfield Ave (East Los Angeles)

○ Cost Estimate

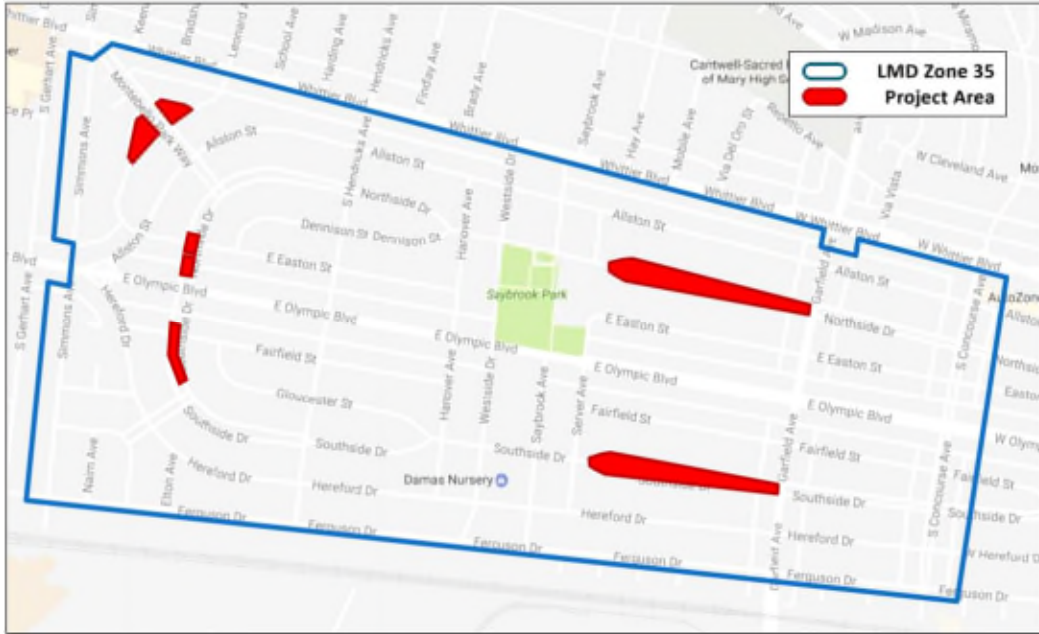

- Total Project Cost: \$20 M
 - Grant Funding: \$4.5M
 - Upon completion of design plans, the County will finalize a cost-sharing agreement with the Cities of Monterey Park and Montebello.
- Volume Captured: 21 Acre-Feet

○ Tentative Milestone Schedule

- Currently – Design Phase
- Summer 2018 – Complete Final Design Plans
- Fall 2018 – Start construction
