Compton Creek Stormwater and Urban Runoff Capture and Reuse Project at Earvin Magic Johnson Park

- **Project Scope**
  
  The Project will divert urban and stormwater runoff into a water treatment system for landscape irrigation reuse. The Project will utilize the existing southern lake for temporary storage of 7 acre-feet and will later expand to the northern lake for an additional storage of 5 acre-feet. The Project will also enhance the park’s amenities by incorporating biofiltration gardens, low-impact-development features, and educational signage.

- **Project Benefits**
  
  The Project will improve the quality of our rivers and ocean, increase local water supply, provide community enhancement and educational and outreach opportunities.

- **Project Location**
  
  - Earvin Magic Johnson Park (905 East El Segundo Boulevard, Los Angeles)
    - Major Intersection: El Segundo Boulevard and Wadsworth Avenue

- **Cost Estimate**
  
  - Total Project Cost of Phase 1A: $70M
    - Cost for Stormwater Capture and Reuse Components: $28.3M
      - County General Fund: $10.1M
      - Flood Control District: $18.2M
    - Cost for Other Components: $41.7M
  - Volume Captured: 7 Acre-Feet

- **Tentative Milestone Schedule**
  
  - In Construction
  - Complete Construction - Spring 2020
