Monteith Park and View Park Green Alley Stormwater Capture Project

- **Project Scope**
  The Project will capture and infiltrate urban stormwater runoff, and include above ground landscaping, low-impact-development features, and educational signage.

- **Project Benefits**
  The project will improve water quality by reducing pollutant such as bacteria, metals, and trash from entering the Ballona Creek and Santa Monica Bay. The infiltration systems will intercept and infiltrate runoff from the 85th percentile 24-hour storm.

- **Project Location**
  - Monteith Park (4616 South Mullen Avenue, Los Angeles)
    - Major Intersection: South Mullen Avenue and Olympiad Drive
  - View Park Green Alley (4356 South Victoria Avenue, Los Angeles)
    - Major Intersection: South Victoria Avenue and West Mount Vernon Drive

- **Cost Estimate**
  - Total Project Cost: $9.1 M
  - Grant Funding: $1M
  - Volume Captured: 9.3 Acre-Feet

- **Tentative Milestone Schedule**
  - Project Concept Report – Spring 2019
  - Design Plans Complete – Summer 2020
  - Award Construction Contract – Late 2020
  - Complete Construction – Late 2021
