Mulholland Hwy et al Super Green Streets
Stormwater Capture Project

- **Project Scope**
  The Project will divert urban and stormwater runoff for groundwater infiltration and landscape irrigation reuse. The project will also include low-impact-development landscaping features and educational signage.

- **Project Benefits**
  The project will improve water quality by reducing pollutants from entering Malibu Creek and provide an alternate source of water for irrigating the County park facility.

- **Project Location**
  - Various along Mulholland Highway (near Agoura Hills)
    - Mulholland Highway near Waring Drive, Careful Avenue, and Outlet Tract

- **Cost Estimate**
  - Total Project Cost: $3.4M

- **Tentative Milestone Schedule**
  - Complete Project Concept Report – Fall 2019
  - Finalize Design Plans – Spring 2020
  - Begin Construction – Fall 2020
  - Complete Construction – Winter 2020
