

## **Hasley Canyon County Park Regional Stormwater Capture Project**

### ○ **Project Scope**

To divert urban and stormwater runoff from local unincorporated communities for groundwater infiltration and landscape irrigation reuse. The project will also include Low-Impact-Development landscaping features and educational signage.

### ○ **Project Benefits**

The project will improve water quality by reducing pollutants such as bacteria from entering Santa Clara River and the ocean and provide an alternate source of water for irrigating the County park facility.

### ○ **Project Location**

- Hasley Canyon County Park (28700 W. Quincy St, Castaic)
  - Near Quincy St & Cambridge Ave

### ○ **Cost Estimate**

- Total Project Cost: \$9.55M
- Volume Captured: 8 Acre-Feet

### ○ **Tentative Milestone Schedule**

- Currently – Planning Phase
- 2018 – Complete Project Concept Report
- 2018 to 2019 – Prepare Design Plans
- 2019 – Award Construction Contract

**Site Layout**

**General Vicinity Map**
