# Timeline for Stormwater Investment Plans

# Process for SIP Project Recommendations

WASC considers watershed-wide needs in consultation with Watershed Coordinator and all interested stakeholders, with an emphasis on striving toward Program Goals.

Applicants submit potential Feasibility Studies, project concepts, or scientific studies into the SCW Program Projects Module.

District reviews submitted feasibility studies, project concepts or scientific studies for completeness and notify WASCs

The WASC initiates a discussion of submittals and determines which projects to transmit to the Scoring Committee for scoring.

If applicable, Chair or District staff contact applicants to schedule a presentation at a future WASC meeting.

# Process for SIP Project Recommendations

The WASC further discusses the scored projects, project concepts, and scientific studies and determines which projects to include in the Stormwater Investment Plan (SIP).

The Regional Oversight Committee (ROC) reviews each SIP and provides its findings and recommendations to the WASC to confirm final recommendations.

The ROC submits its final findings and recommendations to the Board of Supervisors.

The Board of Supervisors approves funding and a Fund Transfer Agreement is executed.
