

SCWP –ROC

Proposed repackaged/consolidated Biennial Report Recommendations

By Carl Blum ROC Advisory Member

10/26/2023

1. Expedite Watershed Planning efforts by : (1)
 - A. Establishing Storm water capture (6)
quantitative goals and developing a plan
,with timelines, to accomplish these goals
 - B. Establishing Storm water cleanup (10)
quantitative goals and developing a plan,
with timelines, to accomplish these goals
 - C. Obtaining additional dedicated resources to
provide pro-active leadership and
management of the SCWP and its
numerous goals (15)
 - D. Developing guidelines/criteria to
incentivize large infrastructure
improvements and investments (8c)
 - E. Developing guidelines/criteria to streamline
various sized projects and at varying
stages of development (3)
 - F. Creating /strengthening collaborative
planning and funding with other water
related agencies/organizations to
maximize the water supply benefits to
the citizens of Los Angeles County. (8c)

2. Upon completion of the Metrics and Monitoring Study, in early 2024, evaluate, and if and when appropriate, make changes to the procedures and guidelines currently used to manage the various goals/programs of the SCWP.
(2) (4) (5) (7) (8) (9)
3. Refine the process and timing of the ROC review of WASC approved projects to expedite those projects (13)
4. Change the reporting to the ROC on progress on Regional Projects from quarterly to semi-annual (14)
